WINDWORKS: A BIBLIOGRAPHY

by

Ben Wolf
Windworks
Mukwonago, Wisconsin

TABLE OF CONTENTS

		Page
I.	WIND	1
II.	WINDMILLS	5
III.	AERODYNAMICS	24
IV.	ELECTRICAL	28
V.	TOWERS	30
VI.	STORAGE	32
VII.	CONVERSION	33
VIII.	GENERAL	37

Section I: WIND

Behavior

The Airflow over Mountains; G. A. Corby; Royal Meterological Society Journal No. 346; October 1954, p. 491.

The Analytical Formulation of Wind Speed Frequency Curves (German); F. Wenk; Windkraft-Mitt No. 5; Translated by Else van den Muyzenberg; Brace Research Institute Publication; 1970.

Atmospheric Circulation Systems; Plamer and Newton, Academic Press, 1969.

Atmospheric Turbulence; Methuen's Monographs on Physical Subjects; O. G. Sutton; Methuen and Co., Ltd. (London); 1960.

The Effect of Wind Fluctuations on the Choice of Speed for Wind Power Plants (German); U. Hutter; Elektrotech. Z. (E.T.Z.); Vol. 1, December 1948, pp. 117-122; Vol. 2, January 1949, pp. 10-15.

An Experimental Study of Wind Structure with Reference to the Design and Operation of Wind Driven Generators; M. P. Wax; Electrical Research Assoc. pub. no. C/T 114; 1956, 24 pp.

Note on Change of Wind with Height; L. W. Bryant; Aeronautical Research Committee Reports and Memo No. 1407; 1931.

Relation between Ground Contours, Atmospheric Turbulance, Wind Speed and Direction; W. R. Morgans; Aeronautical Research Committee Reports and Memo. No. 1456, 1931.

The Role of Momentum Exchange in Flow Over a Heated Island; M. Garstang; Internal Report, Florida State University; 1967.

Variation of Wind Velocity Near the Ground; N. Cruthers; Quarterly Journal Royal Meterological Society; October 1943.

Wind Measurement on a Tall Tower in Rough Terrain; D. H. Slade; Journal of Applied Meterology Vol. 8; April 1969, pp. 293-297.

Measurement

A Comparison of Monthly Mileages from 45B and U2A Anemometers; S. R. Anderson; Canadian Department of Transportation; 1956.

The Design and Development of Three New Types of Gust Anemometers; H. H. Rosenbrock; Electrical Research Assoc. pub. no. C/T 106; 1951, 37 pp.

Experimental Studies of Anemometers; S. P. Fergusson; Harvard Meterological Study No. 4; Oxford University Press, 1939.

Experiments with Wind: A Pendulum Anemometer and Miniature Tornadoes; C. L. Strong; Scientific American; October 1971; pp. 108-112.

The Measurement of Airflow; E. Ower; Chapman and Hall Ltd.; 1949.

Methods of Analysis of Wind Power Potential to Give Regional Characteristics; Academy of Sciences, USSR; 1963; 190 pp.

A Pendulum Anemometer; P. L. Clemens; Scientific American; 1961; pp. 108-110.

The Sensitiveness of Anemometers; S. P. Ferguson; Bulletin of the American Meterological Society; April 1934; p. 95.

A Simple Form of Sensitive Electric Contact Cup Anemometer; S. G. Crawford; Junior Science Instructor No. 28; 1951; pp. 36-37.

Treatise on Meterological Appartus and Methods; Cleveland Abbe; Government Printing Office (Washington); 1888.

What are We Measuring on the Top of the Tower; Sanuki and Tsuda; Papers in Meterology and Geophysics No. 8; 1957; pp. 98-101.

Wind and Gust Measuring Instruments Developed for a Wind Power Survey; H. H. Rosenbrock and J. R. Tagg; Electrical Research Assoc. pub. no. C/T 104; 1951; 10 pp.

Wind Measurement on a Tall Tower in Rough Terrain; D. H. Slade; Journal of Applied Meterology Vol. 8; April 1969; pp. 293-297.

Data

Climatic Atlas of the U.S.; U.S. Department of Commerce; 1968; 80 pp.

Climatological Atlas of the British Isles; Air Ministry, Meterological Office; H. M. Stationary Office, 1952.

Energy Available for Windmills in India; Journal of Scientific and Industrial Research Vol. 11A, No. 8; New Delhi.

Extreme Wind Speeds in the Commonwealth Carribbean; H. S. Shellard; Caribbean Meterological Institute; 1970.

Wind Data for Windmills; V. D. Iyer; Ind. Met. Dep. Sc. Notes VI, 63; 1935.

Wind Data Related to the Generation of Electricity by Wind Power; J. R. Tagg; Electrical Research Assoc. pub. no. C/T 115; 1957; 52 pp.

Wind Tunnels

Defining the Flow Field of an Open Jet Wind Tunnel; D. B. Poole and D. E. Cromack; Themis-UM-70-3 (AD 709-158); June 1970.

Industrial Uses of Wind Tunnels with Particular Reference to Wind Machines; K. Emsile; North Atlantic Treaty Organization; Advisory Group for Aeronautics and Development Rep. 306; October 1960.

Problems of Atmospheric Shear Flows and Their Laboratory Simulation; J. E. Cermak and S.P.S. Arga; Boundary Layer Meterology 1; 1970; pp. 40-60.

Simulation of Atmospheric Motion by Wind Tunnel Flows; J. E. Cermak et al; Fluid Dynamics and Diffusion Laboratory; Colorado State University; Technical Report CER66JEC-BAS-EJP-GJB-HC-RNM-S117; May 1966.

A Smoke Generator for use in Fluid Flow Visualization; Yu, Sparrow, and Ekert; International Journal of Heat and Mass Transfer Vol. 15; pp. 557-558.

A Type of Wind Tunnel for Simulating Phenomena in the Natural Wind; H. Peterson; North Atlantic Treaty Organization; Advisory Group on Aeronautics and Development Rep. 308; October 1960.

Wind Tunnel Testing; Alan Pope; John Wiley and Sons; 1958.

General

Annual Availability and Speed Characteristics of the Wind for Wind Power Utilization (German); H. Pigge; Elektrizitatswirtschaft Vol. 54; October 1955; pp. 704-709.

The Distribution of Wind Over the Surface of the Earth Calculated from the Laws of Flow in Pipes (German); L. Prandtl and W. Tollmein; Zeitschrift fur Geophysik Jahrg 1 Helft/2; 1925; pp. 47-55.

Energy from the Wind; World Meterological Organization; Technical Report No. 4; 1954.

Large Scale Balance of Kinetic Energy in the Atmosphere; E. C. Kung; Monthly Weather Review Vol. 94; 1966; pp. 627-640.

Man and the Winds; E. Aubert de la Rue; Hutchinson; 1955.

The Man who Taught the Wind to Blow Him; Ken Kesey; Garage Sale; Viking Press; 1973; pp. 234-238.

Methods in Climatology; V. Conrad; Harvard University Press; 1955.

The Selection and Characteristics of Wind Power Sites; E. W. Golding and A. H. Stodhart; Electrical Research Assoc. pub. no. C/T 108; 1952; 32 pp.

Shelterbelts and Windbreaks; J. M. Carbon; Faber and Faber Ltd.; 1965.

A Short Course in Elementary Meterology; W. H. Pick; Air Ministry; H. M. Stationary Office; 1938.

Song of the Sky; G. Murchie; Riverside Press; 1954; 438 pp.

Using the Wind for Power; E. W. Golding; Weather No. 15; 1960; pp. 113-121.

Wind and Sailing Boats; Alan Watts; Quadrangle Books; 1967; 224 pp.

Wind as a Supplementary Power Source; editorial in: Electrical Engr. Merch., Vol. 28; June 1951; p. 67.

Wind Energy: Its Value and the Choice of Site for Exploitation (French); P. Ailleret; Rev. gen. Elect., Vol. 55; March 1946; pp. 103-108.

Wind Energy and its Utilization by Windmills (German); A. Betz; Gottingen, Bandenhoek, and Rupecht; 1926.

The Winds; George Hidy; Van Nostrand Co.; 1967; 174 pp.

World of Wind; Slater Brown; Bobbs-Merrill; 1961; 224 pp.

Section II: WINDMILLS

Historic Perspectives

British Windmills and Watermills; C. P. Skilton; Collins (London); 1947.

The Dutch Windmill; F. Stokhyuyzen; Merlin Press; 1962; 128 pp.

The Early Windmills of New Jersey and Nearby States; H. B. Weiss and G. M. Weiss; New Jersey Agricultural Society; 1969; 63 pp.

The English Windmill; R. Wailes; August Kelley, publisher; 1967.

In Search of English Windmills; R. T. Hopkins and S. Freese; London; 1931.

Old Mills News; Society for the Preservation of Old Mills; Box 435 Wiscasset, Maine 04578.

Old Windmills of England; R. T. Hopkins; 1930; 245 pp.

The Orkney Windmill and Wind Power in Scotland; J. Venters; Engineer, Vol. 189; January 1950; pp. 106-108.

Research Inspired by the Dutch Windmills; Prinsenmolen Committee; H. Veenman en Zonen; 1960.

The Story of the Sprowston Mill; H. C. Harrison; Phoenix House (London); 1949.

Windmills; F. Brangwyn and H. Preston; 1923; 126 pp.

The Windmills and the Copper Walls of Barbados; Journal of the Barbados Museum and Historical Society, Vol. 31, No. 2; 1965; pp. 43-60.

Windmills and Millwrighting; Stanley Freese; Great Albion Books; 1971; 169 pp.

Windmills of Murcia; Paul Oliver; Shelter; December 1973; p. 166.

Windmills in Sussex; A. F. Hughes; Walker's Galleries Ltd.; 1930; 34 pp.

Windmills - Their Rise and Decline; R. Wailes; Engineering Heritage, Vol. 1; The Institute of Mechanical Engineers; 1963; pp. 7-10.

Windmills and Watermills; W. Coles Finch; London; 1933.

Windmills and Watermills; John Reynolds; Praeger Publishers; 1970; 196 pp.

Developing Countries

Comments on the Brace Research Institute Windmill; A. Wilson; Ministry of Overseas Development, Barbados; Brace Research Institute pub. no. I.76; March 1972.

The Economics of Generating Electricity from Wind Power in India; R. Ramatathan; Indian Quarterly Journal of Economics; January 1970; pp. 245-255.

The Economics of Wind-Powered Desalination Systems; T. A. Lawand; Brace Research Institute pub. no. T.36; June 1967; 56 pp.

The Field Performance of a Windmill Powered Sprinkler Irrigation System; J. M. Ionson; Brace Research Institute pub. no. MT.8; July 1969; 96 pp.

Implications of the Utilization of Wind Power for the Development of Small Caribbean Communities; R. E. Chilcott; Brace Research Institute pub. no. R.25; 1971.

Is There a Place for the Windmill in the Less Developed Countries; M. F. Merriam; East-West Technology and Development Institute, Honolulu; Working Paper Series No. 20; March 1972; 36 pp.

A Note of the Pumping Capacities of Conventional Windmill Pump Installations; National Aeronautical Lab. rep. no. TN-WP-8-6-2 (India); June 1958.

Notes on the Selection of a Suitable Water Pumping System for the Greenland Windmill; T. Lawand; Brace Research Institute pub. no. I.36; May 1967; 8 pp.

Potential of Wind Power Utilization in the Artic Environment; House Heating; C. Bettignies; Brace Research Institute pub. no. DT.8; August 1970; 40 pp.

Preliminary Report on Wind Power Potential in India; E. W. Golding; National Aeronautical Lab. TN-WP-7-62 (India); 1954.

Proposal for the Establishment of a 10 hp Windmill Water Pumping Pilot Plant in Nevis, West Indies; R. E. Chilcott and E. B. Lake; Brace Research Institute pub. no. I.45; April 1966, 4 pp.

Proposal Submitted to the Freedom from Hunger Campaign, F.A.O., for the Development of a Low Cost Two-Bullock Power Wing-Rotor Wind Machine for Water Pumping in Underdeveloped Arid Areas; G. T. Ward; Brace Research Institute pub. no. I.26; November 1963; 10 pp.

Report of N.C.S.T. Expert Committee on Wind Power; Part I and II; Department of Science and Technology, Government of India; June 1973.

The Sail Wing Windmill and its Adaptation for Use in Rural India; M. M. Sherman; Proceedings of 5th Annual Meeting of All India Solar Energy Working Group; November 1973.

Studies on Utilization of Wind Power in India, Part I, Preliminary Survey; P. Nilkanthan and Varadarajan; National Aeronautical Lab. TN-WP-11-62; 1954.

Utilization of Wind Power in Arid Areas of Rajasthan; N. L. Kachhara; Indian Journal of Power and River Valley Development 17; August 1967.

The Utilization of Wind Power in Desert Areas; E. W. Golding; Electrical Research Assoc. pub. no. C/T 110; 1953; 11 pp.

Wind Powered Water Pumps in India: past, present and future development; M. Sherman; 7th Annual All India Workshop on Farm Machinery; April 1974; 26 pp.

Water Lifting Devices for Irrigation; A. Molenaar; Food and Agriculture Organization of the United Nations; 1956; 79 pp.

Large-scale Installations

An Aero-electric Plant of Medium Power; R. Vezzani; The Engineers Digest, Vol. 12, No. 5; May 1951.

Design of Large Wind Power Generators; C. Martini; Elektrotech u. Maschinerbau, Vol. 57; February 1939; pp. 83-89.

The Economic Use of Wind Energy for Large-Scale Generation of Electricity; E. W. Golding; Elektrizitatsverwertung, Vol. 25; December 1950; pp. 235-239.

Fitting Wind Power to the Utility Network; Percy H. Thomas; Federal Power Commission Report no. 099558; February 1954; 24 pp.

Large-Scale Generation of Electricity by Wind Power; E. W. Golding; Electrical Research Assoc. pub. no. C/T 101; 1949; 15 pp.

1000 kw Windmill; Engineer, Vol. 172; July 1941; p. 43.

1000 kw Wind Power Electric Generating Plant; Engineering, Vol. 154; July 1942; pp. 81-83.

Parallel Operation of a Wind Power Station with a Powerful Grid; V. N. Andrianov and D. N. Bystritskii; Elektrichestvo, No. 5; 1951; pp. 8-12.

Project of Wind Motor with Aerodynamic Transmission for Capacities of 100-300 kw; N. V. Krassovosky; Izv. Akad. Nauk., Vol. 5, USSR; 1939; pp. 65-77.

Power from Offshore Winds; W. E. Heronemus; Proceedings of the 8th Annual Marine Technology Society Conference; Washington, D.C.; 1972.

Power from the Wind; P. C. Putnam; Van Nostrand Co.; 1948; 223 pp.

A Preliminary Study of a Large Wind Power Electricity System Sited in the Lake Ontraio Region; Wm. Heronemus; Published by author; August 1973; 22 pp.

Proposal for the Installation of an Autonomous Electricity Network Supplied by a 20kw Wind Generating Plant at Sedge Pond Estate, Barbados; G. T. Ward; Brace Research Institute pub. no. T.6; 1964; 24 pp.

Smith-Putnam 1000 kw Windmill; Mechanical Engineering, Vol. 63; June 1941; pp. 473-474.

Smith-Putnam Wind-Turbine Project; J. E. Wilbur; Boston Soc. Civil Engrs. Journal, Vol. 29, No. 3; 1942; pp. 211-228.

The Testing of Wind-Driven Generators Operating in Parallel with a Network; D. E. Villers; Electrical Research Assoc. pub. no. C/T 116; 1957; 22 pp.

Wind Generated Electricity - Prototype 100 kw Plant; Engineering, Vol. 179, No. 4652; March 1955; p. 371.

World's Largest Wind Turbine Plant Nears Completion; Power, Vol. 86, No. 6; 1941; pp. 56-59.

High Speed Electrical Generators

The Automatic Operation of a Medium-sized Wind-driven Generator Running in Isolation; J. G. Walker; Electrical Research Assoc. pub. no. C/T 122; 1960; 14 pp.

The Design of High Speed Windmills Suitable for Driving Electrical Generators; Report No. PAA-32; National Research Laboratories, Ottawa; 1937.

Dynamic Analysis of High Speed Wind Turbine Systems; J. S. Duggal; Brace Research Institute pub. no. MT.9; 1971; 92 pp.

Electric Energy from the Wind; R. G. Kloeffler and E. L. Stiz; Kansas State College Bulletin Vol. XXX, No. 9; September 1946.

Electric Power from the Wind; Henry Clews; Solar Wind Publications; 1973; 29 pp.

Electrical Energy from the Wind; E. W. Golding; Proc. Instn. Elect. Engrs., Vol. 102, Pt. A; December 1955; pp. 677-695.

Energy from the Winds; United Power News; United Power Association; January 1972; pp. 3-7.

Foundation for the Generation of Electricity by Windmills; B. W. Colenbrander, Secretary; Jan Steenlaan 12; Heemstede, Netherlands.

The Generation of Electricity by Windpower; E. W. Golding; 1955; 318 pp.

Giant Wind Machine for Generation of Electricity Gets Federal Scrutiny; Dick Coon; The National Observer; June 24, 1972.

Medium Output Wind Generator; Elect. Times, Vol. 130; October 1956; p. 606.

A New Propeller Type High Speed Windmill for Electric Generation; E. N. Fales; ASME Transactions, Vol. 19; Paper AER-50-6; 1928.

A 1 kw Wind Driven Domestic Lighting Plant at Spring Head, St. James, Barbados; M. Simonds; Brace Research Institute pub. no. T.7; 1964; 11 pp.

Performance Test of an 8 Meter Diameter Andreau Windmill; A. Bodek; Brace Research Institute pub. no. T.7; 1964; 24 pp.

The Potentialities of Wind Power for Electricity Generation; with Reference to Small Scale Operation; E. W. Golding and A. H. Stodhart; Electrical Research Assoc. pub. no. W/T 16; 1949.

Production of Power by Means of Wind-Driven Generator; U.S. Congress House Interior Committee Hearing on H.R. 4286; 82nd Congress; U.S. Government Printing Office; 1951; 41 pp.

Water Pumping and Electricity from Windmills; E. W. Golding; Agriculture, Vol. 69 (London); 1962; pp. 19-24.

A Wind-Driven Generator; Engineer, Vol. 195; February 1953; p. 242.

Wind Driven Generator; Kendall Ford; Popular Science; August 1938.

Wind Driven Generator Plant; C. Roberts; Electrical Engineer and Merchandiser; June 1967.

Wind-Driven Generators: The Difference Between the Estimated Output and Actual Energy Obtained; J. R. Tagg; Electrical Research Assoc. pub. no. C/T 123; 1960.

Wind-Generated Electricity and its Possible Use on the Farm; E. W. Golding; Farm. Mech., Vol. 114; March 1953.

Windmill Electric and Power; W. Manikowske; North Dakota Agriculture Experimental Station; Bulletin No. 105; August 1913.

Windmills for Electricity Supply in Remote Areas; G. Gimple and A. H. Stodhart; Electrical Research Association pub. no. C/T 120; 1958; 24 pp.

Windmills for the Generation of Electricity; C. Brown; Nat. Inst. Agric. Eng. Library; 1933; 16 pp.

Windmills for Water Lifting and the Generation of Electricity on the Farm; E. W. Golding; F.A.O. Farm Informal Working Bulletin No. 17; 1961.

The Wind Power Aerogenerator; Twin Wheel Type; Percy Thomas; Federal Power Commission; 1946; 77 pp.

Wind Power Generators; W. S. Sholl; Electrician, Vol. 131; December 1943; pp. 602-603.

Vertical Axis

Investigations Concerning Savonious Rotors and Related Machines; G. Bach; Forschung auf dem Gebiete des Ingenieurwesens 2; June 1931; pp. 218-231.

Optimization and Development of the Savonious Wing Rotor for Power Generation; R. B. MacPherson; University of Massachusetts; Dept. of Civil Engineering.

Performance Tests of a Savonious Rotor; M. H. Simonds and A. Bodek; Brace Research Institute pub. no. T. 10; January 1964; 20 pp.

Power from S-Rotor; M. Hackleman; The Mother Earth News #26; 1974; pp. 78-80.

Preliminary Tests of a High Speed Vertical Axis Windmill Model; P. South and R. Rangi; National Research Council of Canada; Laboratory Technical Report LTR-LA-74; March 1971.

The S-Rotor and its Applications; S. J. Savonious; Mechanical Engineering, Vol. 53, No. 5; May 1931; pp. 333-338.

Windmill with No Arms; P. South and R. Rangi; National Research Council of Canada; Science Dimension Issue no. V; 1972.

A Wind Tunnel Investigation of a 14 ft. Diameter Vertical Axis Windmill; P. South and R. Rangi; National Research Council of Canada; Laboratory Technical Report LTR-LA-105; September 1972.

Wind and Windspinners; M. Hackleman; Earthmind; 1974; 115 pp.

Shrouded

A Preliminary Report on the Design and Performance of Ducted Windmills; G. M. Lilley and W. J. Rainbird; Electrical Research Assoc. pub. no. C/T 119; 1957; 65 pp.

Shrouded Aerogenerator Design Study I; A. Kogan and E. Nissim; Haifa Institute of Technology; Dept. of Aeronautical Engineering Report 17; 1961.

Shrouded Aerogenerator Design Study II; Israel Society of Aeronautical Sciences; 5th Conference on Aviation and Astronautics; 1963; pp. 49-56.

Wind Energy; Hans Meyer; Dome Book II; 1971; p. 121.

Fan Type

One Year's Work Done by a 16 Foot Geared Windmill; University of Wisconsin; Agricultural Experiment Station, Bulletin No. 68; June 1898; 44 pp.

Performance Characteristics of the Macdonald College Fan Mill; D. Croney and G. Thierstein; Brace Research Institute pub. no. CP.18; May 1969; 6 pp.

Home - Built

How to Construct a Cheap Wind Machine for Pumping Water: Instructions for Building a Savonious Rotor; A. Bodek; Brace Research Institute, Do-it-yourself Leaflet No. 5; 1965.

Le Jay Manual Le Jay Manufacturing Co.; Belle Plains, Minn. 56011; 1945; 48 pp.

Plans for the Construction of a Small Wind Electric Plant; A. Benson; Oklahoma State University, Stillwater; pub. no. 33; June 1973.

Sencenbaugh O_2 Powered Delight; J. Sencenbaugh; Mother Earth News #20; 1973; pp. 32-36.

Volunteers for International Technical Assistance (VITA); Mt. Rainier, Md; US/AID Fan Blade Windmill, pub. no. 11133.3; Essex Fan Blade Windmill, pub. no. 11133.1; Helical Sail Windmill, pub. no. 11131.1; Sanvonious Rotor Windmill, pub. no. 11132.1.

Windmills: An Here's an Advanced Design the You can Build; Hans Meyer; Popular Science; November 1972.

Commercial

Instructions for Assembly of Models 622 (6 volt) and 1222 (12 volt) Wind Driven Generators; Dyna Technology Inc.; P. O. Box 3263, Sioux City, Iowa 51102; Part no. 50120; 20 pp.

List of Windmill Manufacturers; G. Smith; University of Cambridge; 1972; 8 pp.

Novel Aerodynamic Wind Powered Pumps; Maschinenfabrik Ludwig Bening; 2847 Barnstorf, P. O. Box 171, Germany; 1970.

A Report on Preliminary Testing of a Lubing Windmill Generator (M022-3G024-400) of the Brace Research Institute; H. L. Nakra; Brace Research Institute pub. no. T.75; 5pp.

Wind Blown Generator; Aerowatt S.A.; 37 Rue Chanzy - 75 - Paris 11^{e}; company report.

Wind Electric Research Report (Evaluation of the Performance of a Commercial Aerogenerator); C. Sanchez-Vilar; Brace Research Institute pub. no. DT.4.

Brace Research Institute Airscrew

The Design Development and Testing of a Low Cost 10 hp Windmill Prime Mover; R. E. Chilcott; Brace Research Institute pub. no. MT.7; 1970; 113 pp.

Estimation of the Maximum Drag and Root Bending Moment on a Stationary Brace Airscrew Windmill Blade and Variation of Airscrew Starting Torque with Blade Angle; P. K. Chosh; Brace Research Institute pub. no. CP.19; May 1969; 13 pp.

Notes of the Development of the Brace Airscrew Windmill as a Prime Mover; R. E. Chilcott; The Aeronautical Journal of the Royal Aeronautical Society, Vol. 73, No. 700; April 1969; pp. 333-334; or Brace Research Institute pub. no. R.38.

Potential for Medium Power, Fixed Pitch, Variable Speed Airscrew Wind Machines in Canadian Agriculture; R. E. Chilcott and G. T. Ward; Brace Research Institute pub. no. R.47; 1968.

Specifications of the Brace 10 hp Airscrew Windmill, 15 Assembly and 70 Detail Drawings; Chilcott, Budgen, Goldstein, Weyts; Brace Research Institute pub. no. T.43; February 1971.

Conferences

New Sources of Energy; Proceedings of Conference, Rome 21-31 August 1961; Wind Power, Vol. 7; United Nations Publication; 1964; 409 pp.

Proceedings of the NSF/NASA Conference on Wind Driven Generators; NASA, Lewis Research Center; J. Savino, ed., 1973.

Solar and Aeolian Energy; A. G. Spanides and A. D. Hatzikakidis; Proceedings of Internation Seminar on Solar and Aeolian Energy, September 1961; Plenum Press; 1964, 423 pp.

Wind Power and Solar Energy; Proceedings of the New Delhi Symposium; UNESCO, Paris; 1956; 235 pp.

Foreign Development

Achievements of Sovert Wind Power Engineering; E. M. Fateev and I. V. Rozhdestvenskii; Vestnik Mashinostroeniya No. 9; 1952; pp. 24-27.

Current State of Wind Power Research in the Soviet Union; N. Levy; Brace Research Institute pub. no. T.56; September 1968.

German Wind Turbine Projects Planned During the Hitler Era; H. W. Hamm; FIAT Final Report No. 1111; May 1947.

The Potential for Medium Power Wind Turbines in Canada and the Caribbean; R. E. Chilcott and G. T. Ward; Paper No. D.50.853 AGM, presented to the Engineering Institute of Canada; Annual General Meeting, Vancouver, B.C.; 10 September 1969.

Recent Development in Large Scale Wind Power Generation in Great Britain; T.G.N. Haldane and E. W. Golding; Paper No. 1 Section K; Fourth World Power Conference (London); 1950.

The Use of Wind Power in Denmark; E. W. Golding and A. H. Stodhart; Electrical Research Assoc. pub. no. C/T 112; 1954; 16 pp.

Why has the Windmill not been more Widely Used in North China; Chhen Li; Kho Hsueh Thung Paro (Science Correspondent), Vol. 2, No. 3; 1951; p. 266.

Wind Power: British Machine in Algeria; Engineering, Vol. 185; March 1958; pp. 297-298.

Wind Power in Denmark; E. W. Golding; Elec. Times, Vol. 133; January 1958, pp. 83-86.

Foreign Languages and Translations

Achievements in Soviet Wind Power Engineering; E. M. Fateev and I. V. Rozhdestvenskii; Vestnik Machinostroeniya, No. 9; 1952; 24-27; Electrical Research Assoc. trans. no. IB 1334.

Les Aeromototeurs Modernes; H. M. Lanoy; Girardot and Cie, Paris; 1947.

Application of Wind Power to Rational Generation to Electricity (Danish); J. Juul; Elektroteknikeren, Vol. 43; August 1947; pp. 137-148.

Comparacion de Diferentes Teorias para el Calculo de la Performance de Molinos; M. A. Nevot; Brace Research pub. no. DT.7; August 1966; 51 pp.

Conditions of Operation and Types of Wind Power Plants for Rural Districts (Russian); V. R. Sektorov; Elektrichestvo, No. 10; October 1949; pp. 33-37.

Developments in Utilization of Wind Power (German); G. W. Meyer; Elektrizitatsverwertung, Vol. 16, Nos. 6/7; September-October 1941; pp. 109-113.

Developments in the Utilization of Wind Power in Denmark (German); D. Stein; Elektrizitatswirtschaft, Vol. 41; 1942.

The Direct Drive of Synchronous Generators by Large Wind Power Stations Operating in Parallel with the Network (German); M. Kloss; Elektrotech. Z. (E.T.Z.), Vol. 63; 1942.

Economic Importance of Wind Power (German); C. Korfer and D. Stein; Elektrizitatsverwertung, Vol. 17; 1943; pp. 193-197.

Economics and Practicality of Large Wind Power Generating Stations (German); H. Witte; Elektrotech Z. (E.T.Z.), Vol. 59; 1938.

Elastic Power Transmission in Wind Power Installations; B. Ganger; H. V. Institute of Karlsruhe Technical High School; March 1947; 12 pp; Electrical Research Assoc. trans. no. IB 1072.

The Energy of Wind (French); G. Lacroix; Tech. Mod., Vol. 41; 1949; pp. 77-83.

Experience in the Utilization of Wind Power for Electric Power Generation; A. Asta; Ricerca Scientifica, Vol. 23, No. 14; April 1953; pp. 537-558; Electrical Research Assoc. trans. no. IB 1305.

Experimental Data on Models of Devices for Accumulating Wind Energy in Space; R. Vezzani; Elettrotecnica, Vol. 35; December 1948; pp. 488-493; Electrical Research Assoc. trans. no. IB 1046.

Experiments with a Model of a Scoop Wheel; (translated title); A. Havinga; Koninklijk Institute van Ingenieurs, The Hague; 1935.

The Generation of Electricity by Windmills (French); L. Vadot; La Houille Blanche, Vol. 13, No. 5; 1958; pp. 526-539; La Houille Blanche, Vol. 14, No. 1, 1959; pp. 15-22.

Investigation of the Possibilities of Wind Power (Danish); C. Kromann Aeroe; Elektroteknikeren, Vol. 45; December 1949; pp. 711-714.

Investigation of the Possibilities of Utilization of Wind Power; J. Juul; Elektroteknikeren, Vol. 45; October 1949; pp. 607-635; Electrical Research Assoc. trans. no. LB 1205.

Investigations Concerning Savonious Rotors and Related Turbomachines; G. Bach; German to English translation by G. T. Ward; Brace Research Institute pub. no. T.41.

The Large Wind Power Plant (German); H. Mayer; Technik, No. 2; December 1947; pp. 527-528.

Lines of Development of Rural Wind Power Plants; K. Schenfer and A. Ivanov; Elektrichestvo, No. 5; May 1941; pp. 21-22; Electrical Research Assoc. trans. no. IB 703.

Model Tests of Wind Power Stations (German); J. Ackeret and C. Caille; Schweiz. Bauztg., Vol. 114, No. 4; 1939; pp. 41-42.

Modern Utilization of Wind Power (German); G. R. Seidel; Elektrotechnikeren, Vol. 4; March 1952; pp. 61-66.

Method of Calculation of Annual Overall Efficiency of Modern Wind Power Plants (Dutch); F. D. Pigeaud; De Ingenieur, Vol. 63; November 1951; pp. 137-140.

The Neuwerk Wind Power Plant (German); W. Mackenthun; Elektrizitatswirtschaft, Vol. 50; November 1951; pp. 322-325.

New Designs of Wind Power Generators; J. Batria; Elektrotech. Obzor., Vol. 38; November 1949; pp. 582-585; Electrical Research Assoc. trans no. IB 1027.

New Wind Power Stations (German); E. Rogge and D. Stein; Elektrizitatswirtschaft, Vo.. 42; November 1943; pp. 358-363.

New Wind Power Units (Russian); Ya. Shefter; Tech. sel. Khoz., Vol. 28, No. 4; 1968; pp. 17-20.

Parallel Operation of a Wind Power Station with a Powerful Grid; V. M. Andrianov and D. N. Bystritskii; Elektrichestvo, No. 5; 1951; pp. 8-12; Electrical Research Association trans. no. IB 1161.

Power Supply by the Wind to the Decimetre-Range Television Link at Schoneberg (Eifel) and Experience Gained (German); G. Rosseler; Nachrichtentech. Z. (N.T.Z.), Vol. 12; July 1959; pp. 352-360.

Practical Experience Gained from the Development of a 100 kw Wind Power Installation; U. Hutter; Brennstoff-Waermekraft, Vol. 16, No. 7; July 1964; pp. 333-341; German to English translation by G. T. Ward; Brace Research Institute pub. no. T.42.

The Present State of Honnef Wind Power Plants; P. Juchem; Elektrotech. Z. (E.T.Z.) B, Vol. 7; May 1955; pp. 187-191.

The Present State of Planning and Erection of Large Experimental Wind Power Stations; V. R. Sektorov; Elektrichestvo, No. 2; 1933; pp. 9-13; Electrical Research Assoc. trans no. IB 1052.

Problems in Calculating the Strength and Design of High Speed Windmills (Russian); Y. Shefter and I. Rozhdestvenskii; Trakt. Selkhozmash, Vol. 28, No. 8; 1958; pp. 19-27.

Problems of Agricultural Wind Power (Russian); Y. Shefter; Vestnik Selkhoz. Nauki, Vol. 17, No. 5; 1972; pp. 102-11.

Problems of Design and Strength Calculations of High Speed Windmills (Russian); Ya. Shefter; Sb. Trud. seml. Mekh., No. 6; 1961; pp. 548-562.

Prospects of the Utilization of Wind Power in Czechoslovakia (Czech); F. Sembera; Elektrotech. Obzor., Vol. 38; September 1949; pp. 477-484.

Regulation of the Output of a Wind Power Station; V. M. Andrianov and A. I. Polataev; Elektrichestvo, No. 6; 1952; pp. 19-24; Electrical Research Assoc. trans. no. IB 1249.

Remarks on Modern Wind-Driven Plant (Italian); G. Serragli; Elettrotecnica, Vol. 34; December 1947; pp. 494-498.

Report of the Operating Characteristics of the Initial 100 kw Aero-electric Unit at Balaclava (Russian); V. R. Sectorov; Elektrichestvo, No. 2; 1933.

Report of Results Obtained with the SEAS Experimental Wind Power Generator (Danish); J. Juul; Elektroteknikeren, Vol. 47; January 1951; ppl 5-12.

Small Wind-Electric Stations for Export (German) G. R. Seidel; Elektrotech. Z. (E.T.Z.), Vol. 70; May 1949; pp. 158-160.

Small Wind Power Generators in Denmark; Elektrizitatsverwertung, Vol. 17; February-March 1943; pp. 197-203.

"SOKOL" 15 kw Wind Turbines Destined for Cuba; Anonymous; Izvestia, Moscow; August 23, 1966.

Stability of a Synchronous Generator Driven by Wind Power and Working on a Power System; V. V. Andrianov; Elektrichestvo, No. 10; October 1949; pp. 26-32; Electrical Research Assoc. trans. no. IB 1015

Statistics of the Power Production of Wind Power Plant and their Evaluation, I (German); D. R. Stein; Elektrizitats-wirtschaft, Vol. 50; October 1951; pp. 279-285; also Part II: ibid.; November 1951; pp. 325-329.

Supplement to the Evaluation of the Results Obtained with the SEAS Experimental Windmill (Danish); J. Juul; Elektroteknikeren, Vol. 48; February 1952; pp. 65-79.

Theory and Calculation of a Wind Turbine; G. D. Mattiolo; Padua; October 1944; Electrical Research Assoc. trans. no. IB 1381.

L'Utilisation de l'Eolienne Rapide Brace comme Source d' Energie Motrice; L'Ingenieur, No. 257; 1970; pp. 8-12.

Utilization of Wind Power (German); J. W. van Heys; Elektrotech. Z. (E.T.Z.), Vol. 61; August 1940; pp. 787-790.

Utilization of Wind Power (German); H. Christaller; Elektrizitatswirtschaft, Vol. 50; November 1951; pp. 320-322.

The Utilization of Wind Power by High Altitude Wind Power Stations (German); F. Kleinhenz; Technik, Vol. 2, Vol. 12; 1947; pp. 517-523.

Utilization of Wind Power for Electrification (Russian); V. R. Sektorov; Elektrichestvo, No. 3; 1953; pp. 11-16.

Water Pumping by Windmills (French); L. Vadot; La Houille Blanche, Vol. 12; No. 4; 1957; pp. 534-535.

Windcraft Theory and Practice; K. Bilau; Paul Parey (Berlin); 1927.

Wind-Electric Pilot Plant of Medium Capacity with Hydralic Energy Accumulation by Pumping (Italian); R. Verzzani; Elettrotecnica, Vol. 37; Sept. 1950; pp. 398-419.

Wind Energy and Its Utilization by Windmills; A. Betz; Gottingen, Bandenhoek, and Ruprecht; 1926; 64 pp.

Wind Energy in the Service of Agriculture (Russian); E. M. Fateev; Tekh. sel. Khoz., Vol. 20, No. 2; 1960; pp. 31-34.

Windkraftwerke; H. Honnef; 1932; 111 pp.

Windmill Generators of 25 kw Output with Diesel Engine Reserve (Russian); V. R. Sektorov; Mekh. Elektrif. sots. sel Khoz., No. 2; 1957; pp. 21-25.

Wind Power Glossary (German); U. Hutter; In Beitrag zum Lueger Lexikon der Technik; BD 6/7 Stuttgart, Deutsche Verlags-anstalt; 1965.

Wind Power in the Rural Districts of the U.S.S.R. (German); D. Stein; Elektrizitatswirstschaft, Vol. 40; February 1941; pp. 54-56.

Wind Power Installation (German); Elektrotech. Z. (E.T.Z.), Vol. 63; June 1942; p. 283.

Ceramic Permanent Magnet Motors; J. R. Dreland; McGraw-Hill; 1968.

D. C. Generators for Use of Wind Power (Italian); A. Carrer; Elettrotecnica, Vol. 36; August 1949; pp. 376-383.

Direct Current Generators with Constant Voltage for Small Wind Power Plants (Russian); K. J. Shenfer and A. A. Ivanov; Elektrichestvo, Vol. 61; 1940; pp. 14-15.

Electric Motor and Generator Repair; Department of the Army; Technical Manual TM 5-764; September 1964.

Large Wind-Driven Synchronous Generators; T. F. Wall; Engineering, Vol. 155; 28 May 1943; pp. 421-423; 11 July; pp. 461-463; 25 July; pp. 501-505.

Parallel Operation of a Synchronous Generator Connected to a System of Infinite Capacity when Driven by a Honnef High Power Wind Turbine (German); L. Linner; Elektrotech. Z. (E.T.Z.), Vol. 69, No. 9; September 1948; pp. 293-296.

Permanent Magnet Generators; D. J. Hanrahan and D. C. Toffolo; Amer. Inst. of Elec. Engnrs. Transactions, Vol. 75; 1957.

Rewind Small Motors; Braymer and Roe; McGraw-Hill; 1949.

Synchronous Machines with Rotating Permanent Magnetic Fields, Parts I and II; M. W. Brainard; Amer. Inst. of Elec. Engrs. Transactions, Vol. 71; 1952.

Alternators

Design of Permanent Magner Alternators; R. M. Sauders and R. H. Weakly; Amer. Inst. of Elec. Engnrs. Transactions, Vol. 70; 1951; pp. 1578-1581.

Electronic Alternator/Regulator System Wiring Diagrams; Motorola, Automotive Products Division; Form 25-98; 1972; 34 pp.

Electronic Alternator Systems; Motorola, Automotive Products Division; Form 25-87; 1972; 55 pp.

Fix Your Own Alternator; M. Schultz; Popular Mechanics; August 1972.

Getting to Know Your Alternator; M. Schultz; Popular Mechanics; March 1963.

High Amperage Alternators: Training Manual; Automotive Electric Assoc.; 1967; 148 pp.

Winding Alternating Current Machines; M. Lewschitz-Garik; Van Nostrand Co.; 1950.

General

Automotive Electrical System; Automotive Electric Assoc. Training Manual; 1957; 103 pp.

Electrical Equipment: Operation and Maintenance Handbook; Delco-Remy, DR-324A; 1962; 238 pp.

Electrical Fundamentals (direct current); Department of the Army, Technical Manual TM 11-661; June 1951.

Electrical Problems Raised by the Utilization of Wind Power; G. Lacroix; Bull. Soc. Franc Elect., Vol. 10; April 1950; pp. 211-215; Electrical Research Assoc. trans. no. IB 1266.

Hayden Electricity Series Vols. 1-7; H. Mileaf, ed.; Hayden Book Co.; 1966.

Investigations on Utilization of Wind Energy: Use of D.C. Generator -H_g-Inverter Groups Connected to A.C. Systems (Italian); A. Asta; Ricerca Sci., Vol. 20; 1950; pp. 53-59.

Problems in the Electrical Equipment of Wind Power Plants (German); M. Kloss; Technik, Vol. 2; November 1947; pp. 471-479.

Production of Heavy Current by Windmills (German); M. Kloss; Elektrotech. Z. (E.T.Z.), Vol. 72; April 1951; pp. 201-202.

Regulation of the Output of a Wind Power Station (Russian); V. N. Andrianov and A. I. Pokataev; Elektrichestvo, No. 6; 1952; pp. 19-24.

A Simple Electrical Transmission for a Free Running Windmill; T. H. Baron and K. Repole; Brace Research Institute pub. no. T.68; August 1970; 29 pp.

Source Book of Electrical Circuts; J. Markus; McGraw-Hill; 1969.

Transitorized Switching Circut Control of a Variable Speed D.C. Motor; I.R.E. Proceedings on Industrial Electronics; 1961.

Utilization of Wind Power by a Ward-Leonard Type Circut with Inverted Operation (Italian); A. Carrer; Elettrotecnica, Vol. 36; August 1949; pp. 383-385.

Section V: TOWERS

Antenna Towers as Wind Power Generators (German); H. Pigge; Elektrotech. Z. (E.T.Z.), Vol. 73; February 1952; pp. 95-96.

Matrix Methods of Structural Analysis; C. K. Wang; International Textbook Co.; 1966.

Mechanical Vibrations; J. P. Den Hartog; McGraw-Hill; 1956.

Practical Solution of Torsional Vibration Problems; W. ker Wilson; Chapman and Hall; 1967.

The Problems of Wind Loading from the Viewpoint of the Design Engineer; T. A. Wyatt; Symposium on Wind Effects on Buildings and Structures; Butlers Ltd.; 1968.

Proceedings of the Conference on Tower Shaped Structures; Organization for Applied Scientific Research in the Netherlands; April 24-26, 1969; The Hague.

Proceedings of the International Research Seminar on Wind Effects on Buildings and Structures; University of Toronto Press; September 11-15, 1967.

The Safety of Strucutres; A. Pugsley; Edward Arnold, London; 1966.

Stress Analysis of 32 ft. 4-post Tower for Windmills; Araindkshanan; National Aeronautical Lab. Engineering Report ER-10-62 (India); 1962.

Vibrations of Tapered Cantilever Beams and Shafts; A. V. Krishna Murty; The Aeronautical Quarterly; May 1969.

Wind Bracing; The Importance of Rigidty in High Towers; H. V. Spur; 1930; 132 pp.

Windmill Tower Design; F. Montesano and A. Fernandez; Brace Research Institute pub. no. EP.2; 1973; 92 pp.

Section VI: STORAGE

Batteries

Batteries and Energy Systems; C. L. Mantell; McGraw-Hill; 1970; 221 pp.

Burgess Engineering Manual; Gould Burgess Battery Division; Freeport, Ill. 61032; 1970.

Electric Battery Directory; Starting, Lighting, Ignition, and Generating Systems; Buyers Guide; Independence Battery Manufacturers Assoc. Inc.; Largo, Fla. (annual).

Ever-ready Battery Applications - Engineering Data; Union Cabide Corp.; Consumer Products Division; 270 Park Ave. NYC 10017; 1971.

Standard Cells, Their Construction Maintenance and Characteristics; W. J. Hamer; National Bureau of Standards, Monograph 84; 1965.

Storage Batteries; Ritter and Allen; International Textbook Co.; 1952.

Storage Batteries; G. W. Vinal; John Wiley and Sons; 1955.

The Structure of Electrolytic Solutions; W. J. Hamer; John Wiley and Sons; 1959.

Compressed Air

Compressed Air; L. I. Wrightman; 1912; 168 pp.

Compressed Air and Gas Data; C. W. Gibblers; Ingersoll Rand; 1969.

Compressed Air Data; F. W. O'Neil, ed.; Handbook of Pneumatic Engineering Practice; 1939; 408 pp.

Compressed Air Power; A. W. Daw and Z. W. Daw; 1920; 376 pp.

Constant Pressure Compressed-Air Storage; S. D. Kalapasev; Power V, Vol. 114, No. 3; March 1970; pp. 90-93.

Flywheels

Potential Applications for the Superflywheel; D. W. Rabenhorst; Proceedings of the 1971 Interscciety Energy Conversion and Engineering Conference paper no. 719148; August 1971; pp. 1118-1125.

The Revolution in Flywheels; R. T. Dann; Machine Design; May 17, 1973; pp. 130-135.

Superflywheel Kinetic Energy Storage Systems; D. W. Rabenhorst; Johns Hopkins University, Applied Physics Lab. APL/JHU RP 001; March 1973.

Theory of Elasticity; Timieshenko and Goodier; McGraw-Hill; 1951.

General

Computer-Aided Design of Power Systems Using Energy Storage; B. Easter; Okla. State University (Ph.D. thesis); 1969.

Energy Storage: Key to Our Economic Future; Hughes, Summers, Allison, West and Fabrycky; Engineering Research; 1962.

Energy Storage Research at Oklahoma State University; Allison, Ramakumar, Hughes; Proceedings of the Midwest Power Symposium; Iowa State University, Ames; October 1970.

An Energy Storage System; B. H. Easter; Simulation; September 1969; pp. 155-164.

Energy Storage System Concepts, Limitations, and Efficiencies; H. J. Allison; Proceedings of a Conference on Energy Conversion and Storage; School of Electrical Engineering, Oklahoma State University; October 1963.

Experimental Data on Models of Apparatus for Storing Wind Energy in Space (Italian); R. Vezzani; Elettrotecnica, Vol. 35; December 1948; pp. 488-493.

Gravity; G. Gamow; Doubleday Anchor paperback; 1962.

Research on Energy Storage and Conversion at Oklahoma State University; H. J. Allison; Advanced Battery Technology, Vol. 3, No. 9; September 1967.

Use of Energy Storage with Unconventional Energy Sources to Aid Developing Countries; K. A. McCollom; Proceedings of 1967 Intersociety Energy Conversion and Engineering Conference; American Soc. of Mechanical Engineers; 1967.

Uses of Energy Storage Systems; Wm. Hughes; Proceedings of a Conference on Energy Conversion and Storage; Oklahoma State University; October 1963.

A Wind Energy Storage and Conversion System for Use in Underdeveloped Countries; Ramakumar, McCollom, Allison and Hughes; Proceedings of 4th Intersociety Energy Conversion Engineering Conference; Paper No. 699074; September 1969; pp. 606-613.

Section VII: CONVERSION

Invertors

A High Power Output DC-AC Invertor with Sinusoidal Output; G. Salters; Electronic Engineering; September 1961; pp. 586-591.

Principles of Invertor Circuts; Bedford and Hoft; John Wiley and Sons; 1964.

60-cycle Invertor; Electronic Circut Design Handbook; TAB Books; Blue Ridge, Summit Pa. 17214.

General

Advances in Energy Conversion; Intersociety Energy Conversion Engineering Conference; Amer. Soc. of Mech. Engrs.; 1967.

The Conversion of Energy; C. Summers; Scientific American; September 1971.

Conversion of Wind Power Plant from Direct to Alternating Current Output; J. Juuls; Organization for European Economic Co-operation; Report of the Committee for Productivity and Applied Research (PRA); Working Party no. 2 (wind power); technical paper no. 39; 1954.

Description and Performance of a Field Modulated Frequency Down Convertor; Ramakumar, Allison and Hughes; 1972 SWIEEECO Record; I.E.E.E. Catalogue No. 72 CHO 595-9 SWIECO; April 1972; pp. 252-256.

Economic Optimization of Energy Conversion with Storage; A. Bruckner and W. J. Fabrycky; 3rd Annual Conference on Energy Conversion and Storage; Stillwater, Okla.; October 1965.

Elements of Energy Conversion; C. Russell; Pergamon Press; 1967.

Elements of Solid State Energy Conversion; Manfred Altman; Van Nostrand Reinhold; 1969.

Field Modulated Down Frequency Convertor: Analysis-Design-Performance; Allison, Ramakumar, Hughes; Proceedings of the Frontiers of Power Technology Conference; Okla. State University, Stillwater; 1971; pp. 3:1-3:18.

Selected Papers on New Techniques for Energy Conversion; Sumner Levine; Dover Publications; 1961.

Transistor Circut Design; Engineering Staff of Texas Instruments; McGraw-Hill; 1963.

Section VIII: HYDROGEN

Production

Design Study of Hydrogen Production by Electrolysis; Allis-Chalmers Mfg. Co.; Milwaukee, Wisc.; Publication no. ACSDS 0106643; October 1966.

Feasibility of Energy Storage by Water Electrolysis and High Pressure Hydrogen Storage; Hughes, Summers, and Allison; Engineering Research Report; Okla. State University; 1962.

Modern Electrolyser Technology; A. K. Stuart; Paper presented at the American Chemical Society Symposium on Non-Fossil Fuels; April 13, 1972.

Production and Distribution of Hydrogen as a Universal Fuel; D. P. Gregory and J. Wurm; Proc. of 1972 Intersociety Energy Conversion Engineering Conference; Paper no. 72908; 1972.

Selection of Electrolytes for Electrolysis Cells: Alkaline of Acid; F. H. Shubert; Paper presented at ASME Space Technology Conference; June 21-24, 1970.

Solid Polmer Electrolyte Water Electrolysis Unit for Utilities Application; General Electric Aircraft Equipment Division; Proposal No. DE-250 Rev. A; March 1973; 34 pp.

Study, Cost and Systems Analysis of Liquid Hydrogen Production; N. C. Halbert; NASA CR 73226; June 1968.

A Wind Energy Storage Technique Utilizing a Hydrogen-Oxygen Electrolysis Cell System; H. J. Allison; Frontiers of Power Technology Conference; 1968.

Storage

Cryogenic Engineering; R. B. Scott; Van Nostrand Co.; 1969.

Metal Hydrides for Energy Storage; Wiswall and Reilly; Proc. of 1972 Intersoc. Energy Conversion Engineering Conf. paper no. 729210; 1972.

Use

Construction and Performance of an Experimental Rechargeable Fuel Cell Battery; R. G. Ramakumar; Frontier of Power Technology Conf.; Okla. State University; October 1970.

Design Criteria for Hydrogen Burning Engines; R. J. Schoeppel; Final Report, contract EHS 70-103; Environmental Protection Agency; October 1971.

The Development of Hydrogen Burning Engines; Schceppel and Murray; Proc. Frontiers of Power Tech, Conf.; Okla. State University; October 1968.

Economic High-Pressure Hydrogen-Oxygen Fuel Cell; Ramakumar, Hughes, and Allison; 5th Intersociety Energy Conversion Engineering Conf.; 1969.

Electrochemical Process in Fuel Cells; M. W. Breiter; Springer-Verlag Co.; 1969.

Emission and Performance Characteristics of an Air-Breathing Hydrogen Fuel Engine; Murray and Schoeppel; Proc. of 1971 Intersoc. Energy Conversion Engineering Conf.; paper no. 719009; August 1971.

Fuel Cells; W. Mitchell; Academic Press; 1963.

Fuel Cells; W. Vielstitch; Wiley Interscience; 1970.

Fuel Cells, Vols. I and II; C. J. Young; Rheingold Publishing; 1963.

Fuel Cells and Fuel Batteries; Liebhofsky and Cairns; John Wiley and Sons; 1968.

Fuel Cells: An Introduction to Electrochemistry; Klein; J. P. Lippincott Co.; 1966.

Fuel Cells: Recent Developments; M. W. Ranney; Noyes Development Corp.; 1969.

Fuel Cells: A Review of Government Sponsored Research; L. G. Austin; NASA SP-120; U.S. Government Printing Office; 1967; 439 pp.

Fuel Cells: Their Electrochemical Kinetics; Bagotskii and Vasil'ev; Consultants Bureau Enterprises; 1966.

Fuel Cells: Their Electrochemistry; J. O'M Brockris; McGraw-Hill; 1969.

Handbook of Fuel Cell Technology; C. Berger; Prentice-Hall; 1968; 607 pp.

History of Hydrogen-Fueled Internal Combustion Engines; R. E. Billings and F. E. Lynch; Energy Research Corp., pub. no. 73001; April 1973; 9 pp.

Importance of Fuel Cell Technology on the Power Systems of the Future; H. J. Allison; Proc. of Frontiers of Power Technology Conf.; October 1970.

An Introduction to Fuel Cells; K. R. Williams, ed.; Elsevier Publishing Co.; 1966.

A New Approach to High Pressure, High Temperature Hydrogen-Oxygen Fuel Cell and Electrolysis-Cell Design; H. J. Allison; Ph.D. Thesis, Oklahoma State University; 1967.

Performance and Nitric Oxide Control Parameters of the Hydrogen Engine; R. E. Billings and F. E. Lynch; Energy Research Corp. pub. no. 73002; April 1973; 10 pp.

The UCLA Hydrogen Car: Design, Construction and Performance; Finegold, Lynch, Baker, Takahaski, and Bush; Society of Automotive Engineers, pub. no. 730507; 1973; 11 pp.

General

The Coming Hydrogen Economy; L. Lessing; Fortune; November 1972; pp. 138-146.

The Economic Value of Hydrogen Produced by Wind Power; A. H. Stodhart; Electrical Research Assoc. pub. no. C/T 111; 1954; 8 pp.

Economics of Hydrogen Fuel for Transportation and Other Residential Applications; Winsche, Hoffman and Salzano; Proc. of 7th Intersociety Energy Conversion Engineering Conf.; 1972.

From Electrocatalysis to Fuel Cells; E. G. Sandstede, ed.; University of Washington Press; 1972; 415 pp.

Hydrogen - A Clean Fuel for Urban Areas; Winsche, Sheehan and Hoffman; Proc. of 1971 Intersociety Energy Conversion Conf. paper no. 719007; 1971.

Hydrogen Economy; D. P. Gregory and O. M. Long; Electrochemistry of Cleaner Environments; J. O'M Brockris, ed.; Plenum Press; 1972.

Hydrogen and the Electric Economy; Deen and Schoeppel; Proc. of Frontiers of Power Technology Conf.; 1971.

Hydrogen Fueld Internal Combustion Engine; R.G. Murray; U.S. patent no. 3,572,297; March 1973.

A Hydrogen-Energy System; D. P. Gregory; American Gas Assoc.; 1972; 396 pp.

Hydrogen Handbook; A. D. Little; Air Force Flight Test Center, Edwards Air Force Base; 1960.

Hydrogen Safety Manual; NASA Report TM-X-52454; 1968.

When Hydrogen Becomes the World's Chief Fuel; Business Week; September 23, 1972.

Section IX: GENERAL

Aircraft Structures; David J. Perry; McGraw-Hill; 1950.

Alternative Sources of Energy; Rt. 1 Box 36 B; Minong, Wi. 54859; (monthly publication).

The Cleaning of America; L. C. Williams; Astronautics and Aeronautics; February 1972.

The Combination of Local Energy Resources to Provide Power Supplies in Underdeveloped Areas; E. W. Golding; Electrical Research Assoc. pub. no. C/T 118; 1956; 21 pp.

Coupled Oscillations of Aircraft Engine and Propeller System; M. Biot; Journal of Aeronautical Science, Vol. 7, No. 9; 1940.

Development of Unconventional Energy Sources for Use in Developing Countries; McCollom and Haneman; Engineering Research Report No. 692A; 1966.

Energy and Power; Scientific American; W. H. Freeman Co.; September 1971.

Energy as a Major Factor in Man's Development; G. T. Ward; Brace Research Institute pub. no. T.11; March 1964; 23 pp.

Energy for Man: Windmills to Nuclear Power; Hans Thirring; Indiana University Press; 1958.

Environment, Power and Society; Howard T. Odum; Wiley-Interscience; 1971.

The Journal of the New Alchemists; New Alchemy Institute; 1973; 64 pp.

The Mechanics of Vibrations; R.E.D. Bishop; Cambridge University Press; 1960.

Power Generation Alternatives; J. C. Whaley; Engineering Division of Seattle Light; 1972.

Power Supplies; E. W. Golding; Overseas Development Institute Pamphlet; 1962.

Solar Energy as a National Energy Resource; NSF/NASA Solar Energy Panel; U. of Maryland; 1972.

A Synopsis of Energy Research 1960-1974; Engineering Energy Lab.; Okla. State University; 1974.

The U.S. Energy Problem; G. C. Sezgo; National Technical Information Service; U.S. Dept. of Commerce No. PB-207517; also InterTechnology Corp. Report No. 0645; November 1961.
